# Karisma V4 Workflow reimagined

## Karisma V4 transforming interoperability.

We recognise the significance of seamless connectivity. Karisma V4, has been crafted to extend the capabilities of your RIS by providing the information you need, when you need it to support your staff at every stage of the patient's journey—saving you valuable time and effort along the way.

By combining the features you love from V3 with a role based user interface, Karisma V4's workflow enhancements provide you with greater functionality and configurability in your RIS. With Karisma V4, you can prioritize delivering exceptional care to your patients and their referring physicians.

Join us as we explore the possibilities of a purpose-built RIS system tailored to enhance your operational effectiveness.

"Karisma's functionality is absolutely brilliant. It has helped us on so many levels."

## **Key Advantages**

#### Intuitive End-to-End Design

Karisma V4 offers an intuitive end-to-end design, ensuring a smoother workflow from start to finish. With easy navigation and clear direction, you'll never have to guess what comes next.

Plus, tailored workflow options for specific roles and the ability to open multiple tabs make learning and mastering Karisma V4 a breeze for your staff.

#### Cutting-Edge Technology for Seamless Integration

Karisma V4 is built on the latest platform, boasting enhanced security and superior integration capability. Powered by our interop API KMG+, you can now connect like never before. Get ready to experience seamless integration and harness the power of interoperability with Karisma V4.

### **Advanced Billing**

Our focus is on simplifying your tasks, allowing you to concentrate on what truly counts.

With our built-in finance module seamlessly linked to your patient data, you can save time and boost profits effortlessly. What's more, our advanced billing options automate Medicare claims and offer improved flexibility, allowing you to split bills and manage non-patient accounts with ease.

### **Approvals Module**

At the heart of patient care lies digital innovation. Introducing our Approvals Module, designed to revolutionise your workflow and minimise appointment errors and disruptions.

Say goodbye to traditional paper-based protocolling with an area to digitally protocol patient services prior to scheduling an appointment getting all the information you need for accurate bookings, ensuring efficiency at every step.

## Role specific workflow improvements.

## Built for enhanced user experience at every touchpoint.

#### Reception

Karisma V4's workflow screens are designed to streamline the process and facilitate user training. These screens can launch automatically upon application start-up, ensuring users can dive into their tasks quickly and easily. Plus, the option for ad hoc SMS allows for separating patient contact from an imaging request, enhancing flexibility and efficiency in reception management.

#### Imaging

Empower your team with the tools they need for a smoother and safer process. With additional features like the imaging tablet screen, your imaging staff have access to all necessary information without being confined to a desk.

This not only reduces paperwork but also minimises infection control risks and the likelihood of incorrect procedures.

#### Reporting

In V4, we've enhanced the reporting workflow interface, enabling the division of reporting requests by user roles. With the introduction of reporting pools, a catalog of reports is now available for specific groups of radiologists, streamlining the reporting process.

Additionally, our interface allows users to quickly identify urgent and pending cases, with pertinent information conveniently displayed at the top of the screen.

#### Analytics

Our data exploration module provides essential insights into your business operations. Designed to standardise analytics through various report templates, it seamlessly integrates with your preferred Business Intelligence Tools, making data analysis effortless and efficient.
